## ETIHAD RAIL launches inaugural Flag Day competition on Social Media

**Abu Dhabi, UAE, 20 October, 2015:** Etihad Rail, the developer and operator of the UAE's national railway network, has launched its first ever social media competition celebrating UAE Flag Day, yesterday.

The Etihad Rail Flag Day competition invites participants to get creative with designing the exterior of the Etihad Rail train in themes inspired by the spirit of the UAE and the celebration of Flag Day.

Etihad Rail has shared an outline template of the train on its website [www.etihadrail.ae/ERFlagDay](http://www.etihadrail.ae/ERFlagDay) which can be downloaded and used for the competition. Three winning designs will be chosen by a panel of Etihad Rail judges and will be eligible for attractive prizes.

For more details about the competition, please visit [www.etihadrail.ae/ERFlagDay](http://www.etihadrail.ae/ERFlagDay).

- ENDS -

Notes to the editors:

## **About Etihad Rail ([www.etihadrail.ae](http://www.etihadrail.ae))**

Etihad Rail was established in June 2009 under Federal Law no. 2, with a mandate to manage the development, construction and operation of the UAE's national freight and passenger railway network. Being built in three stages, the railway network will link the principal centres of population and industry of the UAE, and will form a vital part of the planned GCC railway network across the six countries of the GCC.

Construction on Stage One has been completed, with trains carrying granulated sulphur from the gas fields of Shah and Habshan to Ruwais already operational on a trial basis. Stage Two will connect the railway to Mussafah, Khalifa Port and Jebel Ali port and will see the railway extend to the Saudi and Omani borders.

In addition to the the Operational & Maintenance Agreement with the Abu Dhabi National Oil Company (ADNOC) for the transport of sulphur between Habshan and Shah to Ruwais, Etihad Rail is also in advanced commercial and technical negotiations with other prospective partners, including DP World, ESI, Arkan, and others.

To date, Etihad Rail has signed more than 50 Memorandums of Understanding with a number of customers throughout the Emirates – in industries ranging from petrochemicals and agriculture to aggregates and waste – all of whom recognise rail as the preferred mode of transport for their goods.

Built to international standards, Etihad Rail's state-of-the-art network will span approximately 1,200 km, acting as a catalyst for economic growth and sustained social development. Upon completion, the railway will redefine logistics and transport in the region, providing a modern, safe, efficient and sustainable mode of transport that will connect all regions of the UAE to its neighbouring GCC countries.
